04 Your reading

Overview

The next ten years have a clear shape: the strongest years are 2032 and 2033 and the hardest are 2026 and 2027. Plan your big moves for the strong stretch and keep reserves for the hard one. The 10-year luck cycle changes to Yin Water Rabbit on 16 July 2035, the main turning point of the decade.

The cycle you are in

The luck cycle Yang Wood Dragon, running until 16 July 2035, is led by Peer stars, so it asks you to stand on your own and compete directly. Build independent income and skills, and choose collaborators carefully. Keep boundaries with peers and put every shared money arrangement in writing.

The cycle that comes next

The next luck cycle Yin Water Rabbit starts on 16 July 2035 and is led by Resource stars, so it will favour study, rest and being backed by others. Use the years before it to clear commitments, build a support network and gather the skills you want to lean on.

Build, move, rest

2032 and 2033 are the years to move: push, change, start the big things. 2035 are the years to build steadily on what you have: pick one or two things that already work and add to them bit by bit each month. 2026, 2027, 2028, 2029, 2030, 2031 and 2034 are the years to rest, consolidate and avoid big risks: keep commitments small, protect your cash buffer, and revisit big decisions once the period eases.

How this was worked out

Each year, month and 10-year luck cycle has its own pillar. Each one is scored against your chart: which Ten God it brings to your Day Master, whether its elements help or weigh on you, and how its branch meets your own four pillars. The forecast turns those scores into the theme of the period, work and money, people, pace, and practical advice.
